## EXPERIENCE

### **Victaulic, Easton, PA — Senior Web Developer**

OCT 2011 - PRESENT

- Dramatically increased productivity of sales/marketing departments by building visual project analysis tools
- Reduce time to delivery for line-of-business applications by integrating CI/CD with cloud-based hosting
- Designed and built load-balanced locally hosted applications using OWASP Top 10
- Leveraged complex Powershell scripts to provide automation for scheduled tasks internal workflows
- Built Progressive Web Applications using .Net Core and XAML with Microsoft Fabric UI components
- Constantly testing and evaluating new technologies and methods as they arise to see how they can be incorporated into software development pipeline.

### **Visual Goodness, Inc., NYC — Technical Director**

MAR 2007 - OCT 2011

- Helped to reduce intellectual property loss by managing resource pool for software development and motion graphics engineers
- Led software development team to integrate new custom developed social media platforms into client applications
- Provided budget analysis for software development projects
- Migrated IT infrastructure to a cloud-based platform to ease remote software development and reduce costs
- Implemented version control systems to development process to help streamline development and reduce duplication of effort.
- Led team to build custom CMS platform using Adobe Flex

### **Freelance, Jim Thorpe, PA — Web Development**

AUG 2005 - MAR 2007

- Built dynamic web applications using PHP/Zend/Cake
- Designed and coded back-office applications using Perl/Python
- Optimized backend database system for large online retail company

## SKILLS

Node / npm
